SALE TERMS

All cattle sell under the recommended Sale Terms and Conditions of the American Simmental Association and are available by request. 1/3 semen interest will be retained by breeder on all lots.

GENOMIC TESTING

All bulls have been LD-genomic tested, parent verified and have the genomics entered into their EPD's in the catalog.

DELIVERY

Free delivery within 300 miles for all bulls purchased. We will assist buyers in coordinating loads and make the most economical trucking arrangements possible. The females will need to be picked up within a few days of the sale there is no delivery of the heifers. We will provide free keep on the bulls until April 1, 2024. After April 1, 2024 there will be a charge of $2.00 per day.

GUARANTEE

Bulls will be 100% guaranteed to semen test and breed. If bulls are left at our Ranch to feed until April 1, 2024, risk is at the buyer's expense. It is suggested that all bulls be insured.

CATALOG DESIGN & SALE PICTURES

Triple H Simmentals would like to invite you to the 2024 Dakota Power 20 th Annual Production Sale. Our family would like to express our sincere gratitude to our present, past and future customers for all your continued support throughout the years! We appreciate you. It's hard to believe it's already been 20 years, we would like to thank our past partners for getting us to this point, Tim, Pat, Lori, and Mac thank you all so much. Also, a thank you to our kids and their friends that come out after work or weekends to help us work cattle from vaccinating calves in the spring and fall to clipping bulls picture day and doing video's. Thanks again we couldn't do it without Teylor, Landon, Zach, Zoie, Hope, Tyson, Cord, Hudson, Blake, Alissa on sale day and our wives every day.

We would like to extend our condolences to the Chris Johnson and Scott Rusten families. These two men have been friends of ours for many years and will be truly missed. Please pray for their families as they continue to move forward in their lives.

Again, this year we will be holding the sale at our farm ½ mile East of Hannaford. The bulls and females will be penned there for your viewing, and we will head into Hannaford at 1:00 pm to The Mercantile to hold the video auction. The cattle will be available for viewing Saturday and Sunday 10 am to 6 pm and Monday morning until sale time. We will have a complimentary beef dinner at 11:30 until sale time at 1:00.

As always, we offer free keep until after semen testing has been completed in April. We offer free delivery within a 300-mile radius and will work with you in the event the bulls have further to go. You will be able to view all bulls online on our website or on DVAuction. We also invite you to our place to evaluate prior to the sale, visitors are always welcome.

Every year we expect to offer you a set of bulls superior to those before through AI, Embryo Transfer and Genomic Testing. This set of bulls will have what you are looking for. Look through the offering, find what you like and give any of us a call to discuss your needs. We are always happy to lend a hand in finding the right bull and genetics to fit your operation. We continually hear past customers say our bulls hold up well during and after breeding season. We strive to produce functional cattle which work in our herd and, more importantly, in yours!

The bred females that we are offering are from the heart of our replacement pen. Our cattle are selected for strong maternal traits, udder quality, fertility, fleshing ability, docility, correct structure, and performance that are bred into them with predictability. The heifers have had both rounds of Scour Bos and two rounds of Vira Shield 6 VL5 HB along with all calf hood vaccinations. We feel these females will go on to make great cows.

WE ARE VERY EXCITED ABOUT THIS 2024 OFFERING. ON MONDAY FEBRUARY 12TH, WE WILL BRING ANOTHER GREAT GROUP OF BULLS TO OFFER YOU A SUPERIOR SET OF GENETICS.

The Hanson Family

A GUIDE TO

UNDERSTANDING EPDS

EXPECTED PROGENY DIFFERENCES (EPD): EPD are the most accurate and effective tool available for comparing genetic levels. In using EPD, the difference between two sires' EPD represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPD of +10 and –5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPD is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPD, A would be expected to sire 15-pounds more weaning weight than B. If calving ease were the trait, A would be expected to sire 15-percent more unassisted births in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPD rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPD and $ indexes visit www.simmental.org. Listed below are the units ASA EPD are expressed in:

ALL-PURPOSE INDEX (API):
Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

BACK FAT (BF):
Inches of backfat.

BIRTH WEIGHT (BW):
Pounds of birth weight.

CALVING EASE (CE):
Percent of unassisted births when used on heifers.

CARCASS WEIGHT (CW):
Pounds of carcassweight.

MATERNAL CALVING EASE (MCE):
Percent of unassisted births in first-calving daughters.

MILK (MLK):
Pounds of weaning weight due to milk.

MARBLING (MARB):
Marbling score.

MATERNAL WEANING WEIGHT (MWW):
Pounds of weaning weight due to milk and growth.

RIBEYE AREA (REA):
Square inches of ribeye.

WARNER-BRATZLER SHEAR FORCE (SF):
Pounds of force required to shear a steak.

STAYABILITY (STAY):
Percent of daughters remaining in the cowherd at 6 years of age.

TERMINAL INDEX (TI):
Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

WEANING WEIGHT (WW):
Pounds of weaning weight.

YEARLING WEIGHT (YW):
Pounds of yearling weight.

YIELD GRADE (YG):
Yield grade score.

$ INDEXES: Though EPD allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where $ indexes come in. Through well conceived, rigorous mathematical computation, $ indexes blend EPD and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following $ indexes:

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPD, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra $6,000 over a +50 bull if both are exposed to 30 cows over 4 years ($50 diff. x 30 hd. x 4 yr. = $6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPD and $ indexes visit www.simmental.org.
